

# WoodTech

Finally it is here! Many have tried and all have failed until now. FPI has, exclusive to their company a unique PVC composite fencing product that not only looks like wood but it feels exactly like wood as well. Say goodbye to the timber fence blues where once beautiful timber fences are ruined by weather, age and insects. The WoodTech product resists all weather conditions responsible for aging and rotting. Never worry about preparing your fence for the wet season and certainly never be concerned again by termites dining out at your expense.

**WoodTech**  The Investment for a Lifetime.

**WoodTech**

## PRODUCT SPECIFICATIONS

Finally it is here! Many have tried and all have failed until now. FPI has, exclusive to their company a unique PVC composite fencing product that not only looks like wood but it feels exactly like wood as well. Say goodbye to the timber fence blues where once beautiful timber fences are ruined by weather, age and insects. The WoodTech product resists all weather conditions responsible for aging and rotting. Never worry about preparing your fence for the wet season and certainly never be concerned again by termites dining out at your expense. WoodTech, The Investment for a Lifetime.

WoodTech is the result of engineering a new method of developing PVC products called Macro-molecular technology. The product is a co-extruded style that fuses together the two compounds as if they were one culminating in the end result of a true competitor to wood fencing with all of the advantages of PVC.

This product comes in two styles, 6' Privacy and Ranch Rail (2, 3 & 4 rail) and in three colors - Redwood, Stained Cedar & Natural Cedar.

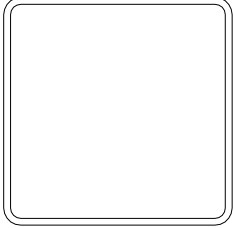

- Product Features - 10% Titanium Dioxide for UV stabilization
- Impact modifiers included
  - Exclusive & patented
  - Looks and feels like wood
  - No annual preparation required
  - No rotting
  - Available in two styles – 6' Privacy and Ranch Rail (2, 3 & 4 rail)
